SKILLS

- **Languages**: C++, JavaScript, C, PHP, Java, Python
- **Frameworks**: HTML and CSS, Tailwind, NodeJS, ReactJS
- **Tools/Platforms**: MySQL, MongoDB, Git, Github
- **Soft Skills**: Problem-Solving, Quick Learner, Adaptability

PROJECTS

- **AI-Powered Resume Builder** | Link — Oct' 25
  - Built a full-stack MERN application for creating, editing, and downloading resumes with AI-powered content generation for summaries and experience descriptions.
  - Implemented secure authentication, data persistence, and customizable templates for an interactive and scalable platform.
  - Deployed RESTful APIs and optimized MongoDB queries to ensure fast and reliable platform.
  - Tech Used – React.js, Node.js, MongoDB, Express
- **Contact Management System** | Link — May' 25
  - Developed a responsive web application with login/registration, full CRUD operations, and features like search, sorting, and favorites.
  - Enhanced user experience through profile management, efficient data handling, and responsive front-end design.
  - Structured clean, modular code ensuring scalability and maintainability across devices.
  - Tech Used - HTML, CSS, JavaScript, PHP
- **Banker's Algorithm Simulator** | Link — May' 25
  - Designed and implemented a Python-based simulator to demonstrate deadlock avoidance using Banker's Algorithm.
  - Simulated process allocation, maximum demand, available resources, and need matrices to evaluate system safety.
  - Improved understanding of operating system concepts through clear logic, modular code, and user-driven inputs.
  - Tech Used - Python

TRAINING

Lovely Professional University – Mastering Data Structures and Algorithms: Link — Jun' 25 – Jul' 25

- Completed an intensive "Mastering Data Structures and Algorithms" summer training program at Lovely Professional University, focusing on core problem-solving techniques and algorithmic foundations.
- Implemented key data structures such as arrays, linked lists, stacks, queues, trees, graphs, and hashing, along with optimized algorithms for real-world computational problems.
- Built a DSA-based project from scratch, applying complexity analysis, clean coding practices, and hands-on experience with debugging, optimization, and efficient data handling.

CERTIFICATES

HackWithVertos 1.0 A 24 Hour Hackathon –Lovely Professional University | Certificate — Jul' 25
NPTEL Certification in Cloud Computing – IIT Kharagpur | Certificate — Apr' 25
Mastering Data Structure and Algorithms Using C++ – LPU | Certificate — Nov' 24

ACHIEVEMENTS.

- **Solved 150+ Coding question**:

  Solved 150+ coding challenges across platforms, strengthening problem-solving and algorithmic skills.

EDUCATION

Lovely Professional University — Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; **CGPA: 8.02** — Aug' 23 – Present

K.L.G Public School — Saharanpur, Uttar Pradesh
Intermediate; **Percentage: 88.8%** — Apr' 22 – Mar' 23

K.L.G Public School — Saharanpur, Uttar Pradesh
Matriculation; **Percentage: 95.6%** — Apr' 20 – Mar' 21
